Universität Zürich[UZH]

Institute of Anatomy

SEMINAR FALL SEMESTER 2026

29.09.2026

Studying the role of the kidney distal convoluted tubule in calcium homeostasis and blood pressure using single-cell and spatial proteomics*

Prof. Robert Fenton, PhD

Aarhus University, Department of Biomedicine, Aarhus, Denmark

Guest lecture hosted by Prof. Johannes Loffing, MD

06.10.2026

No seminar

13.10.2026

The impact of checkpoint inhibition on organ fibrosis*

Eric Nelius

Teaching and research assistant, Group of Prof. Christian Stockmann, MD

Internal speaker hosted by Prof. Christian Stockmann, MD

20.10.2026

The contribution of innervation to tissue repair and regeneration: From basic biology to clinical opportunities*

Prof. Adam Johnston, PhD

Department of Medical Neuroscience, Dalhousie University, Halifax, Nova Scotia, Canada

Guest lecture hosted by Lukas Sommer, PhD

27.10.2026

Decoding the cellular building blocks and tissue niches of human skin*

Prof. Muzlifah Haniffa, MD PhD

Wellcome Sanger Institute, Wellcome Genome Campus, Cambridge, UK; Department of Dermatology and NIHR Newcastle Biomedical Research Centre, Newcastle, UK

Guest lecture hosted by Prof. Christian Stockmann, MD

03.11.2026

The role of peripheral glial cells in late-stage skin wound healing*

Isabel Ballwein

PhD candidate, Group of Prof. Lukas Sommer, PhD

Advanced techniques for CAKUT study on Xenopus: Deep-learning segmentation and tissue expansion microscopy*

José Carlos Martínez Santamaría, PhD

Postdoc, Group of Prof. Soeren Lienkamp, MD

Internal speakers hosted by Prof. Andrew Hall, MD

10.11.2026

Using frogs to uncover the evolution, development and function of motor circuits*

Prof. Lora Sweeney, PhD

Institute of Science and Technology Austria, Klosterneuburg, Austria

Guest lecture hosted by Prof. Soeren Lienkamp, MD

17.11.2026

One Health: Potential of philosophical, ethical, academic und political transformation

Prof. Jakob Zinsstag, DVM PhD

Department of Epidemiology and Public Health, Swiss Tropical and Public Health Institute, Allschwil, Switzerland

Guest lecture hosted by Prof. Caroline Maake, MD

24.11.2026

Chemigenetic tools for advanced live cell microscopy

Prof. Michelle Frei, PhD

Department of Chemistry and Applied Biosciences, ETH Zurich, Zurich, Switzerland

Guest lecture hosted by Prof. Andrew Hall, MD

01.12.2026

Molecular pathogenesis of polycystic kidney disease*

Prof. Michael Köttgen, MD

Department of Medicine, Medical Center, Faculty of Medicine, University of Freiburg and CIBSS - Centre for Integrative Biological Signalling Studies, Freiburg, Germany

Guest lecture hosted by Taiyo Yamamoto, PhD

Lecture 4306
Tuesdays 16.30 to 17.30
University of Zurich
Campus Irchel
Y44 H 05

* Application as continuing education for operators involved in animal experiments, and study directors has been submitted.
